

Idea 1: For my 2d interactive drawing I want to do something similar to the Super Mario 64 title screen, perhaps I can have the user drag a character's face around and you can make the drawing look goofy.

Idea 2: For my 2nd idea I want to use my character design and maybe have some interesting things happen when you click on the screen, such as lightning strikes appearing or maybe if you click certain places different things could happen. Such as clicking on the glasses removes them, etc.

Here is the drawing I could potentially use of my character
